

Common Sense is Common, Making Sense is Uncommon

Peter Norvig
Google

Leibniz (1646-1716)

The only way to rectify our reasonings is to make them as tangible as those of the Mathematicians, so that we can find our error at a glance, and when there are disputes among persons, we can simply say: *Let us calculate*, without further ado, to see who is right.

Les sens commun
est fort rare.

Voltaire (1694-1778)

Probability theory is nothing but common sense reduced to calculation.

Life's most important questions are, for the most part, nothing but probability problems.

Simon Pierre Laplace (1749-1827)

George Boole (1815-1864)

There is not only a close analogy between the operations of the mind in general reasoning and its operations in the particular science of *Algebra*, but there is to a considerable extent an exact agreement in the laws by which the two classes of operations are conducted.

George Boole (1815-1864)

Probability is expectation founded upon partial knowledge. A perfect acquaintance with all the circumstances affecting the occurrence of an event would change expectation into certainty, and leave neither room nor demand for a theory of probabilities.

Bertrand Russell (1872-1970)

Since the world is what it is, it is clear that valid reasoning from sound principles cannot lead to error; but a principle may be so nearly true ... and yet may lead to [absurd] consequences ... *There is therefore a justification for common sense in philosophy* ... The theorist may retort that common sense is no more infallible than logic. But this retort, though made by Berkeley and Hume, would have been wholly foreign to Locke's intellectual temper.

Logic vs. Common Sense

Logic vs. Common Sense

What's an anagram of “Banach–Tarski”?

Logic vs. Common Sense

What's an anagram of "Banach-Tarski"?

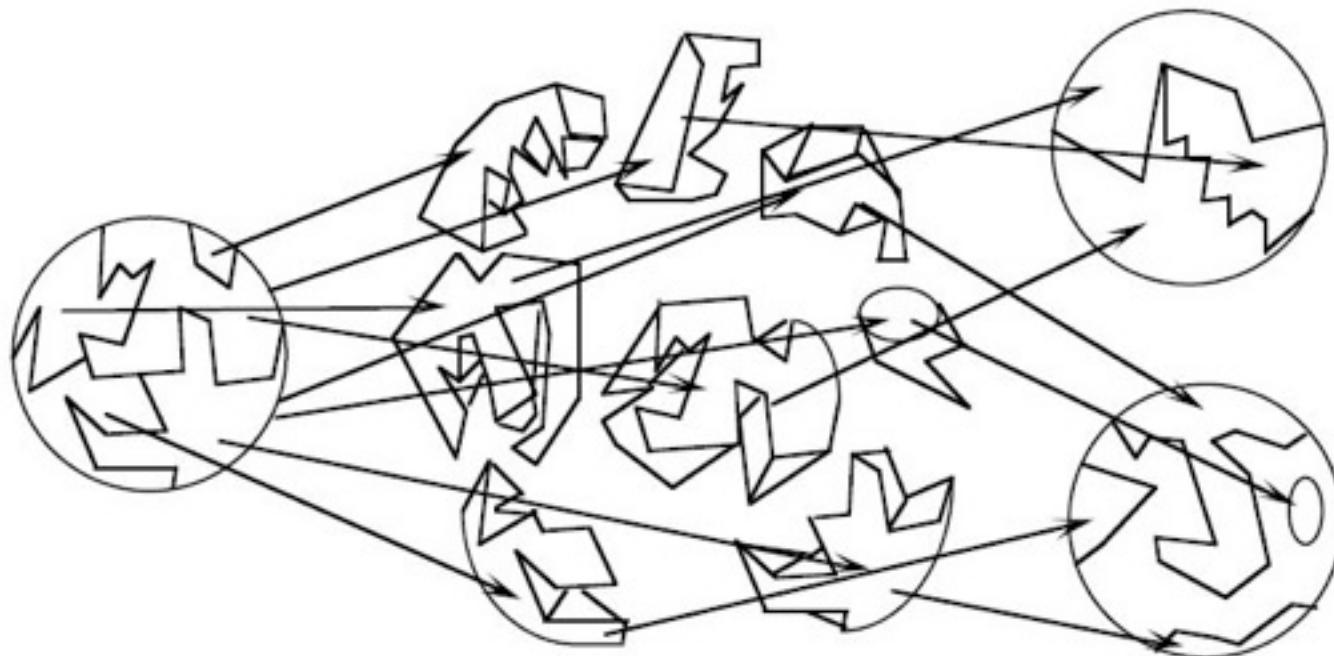

A: "Banach-Tarski Banach-Tarski"

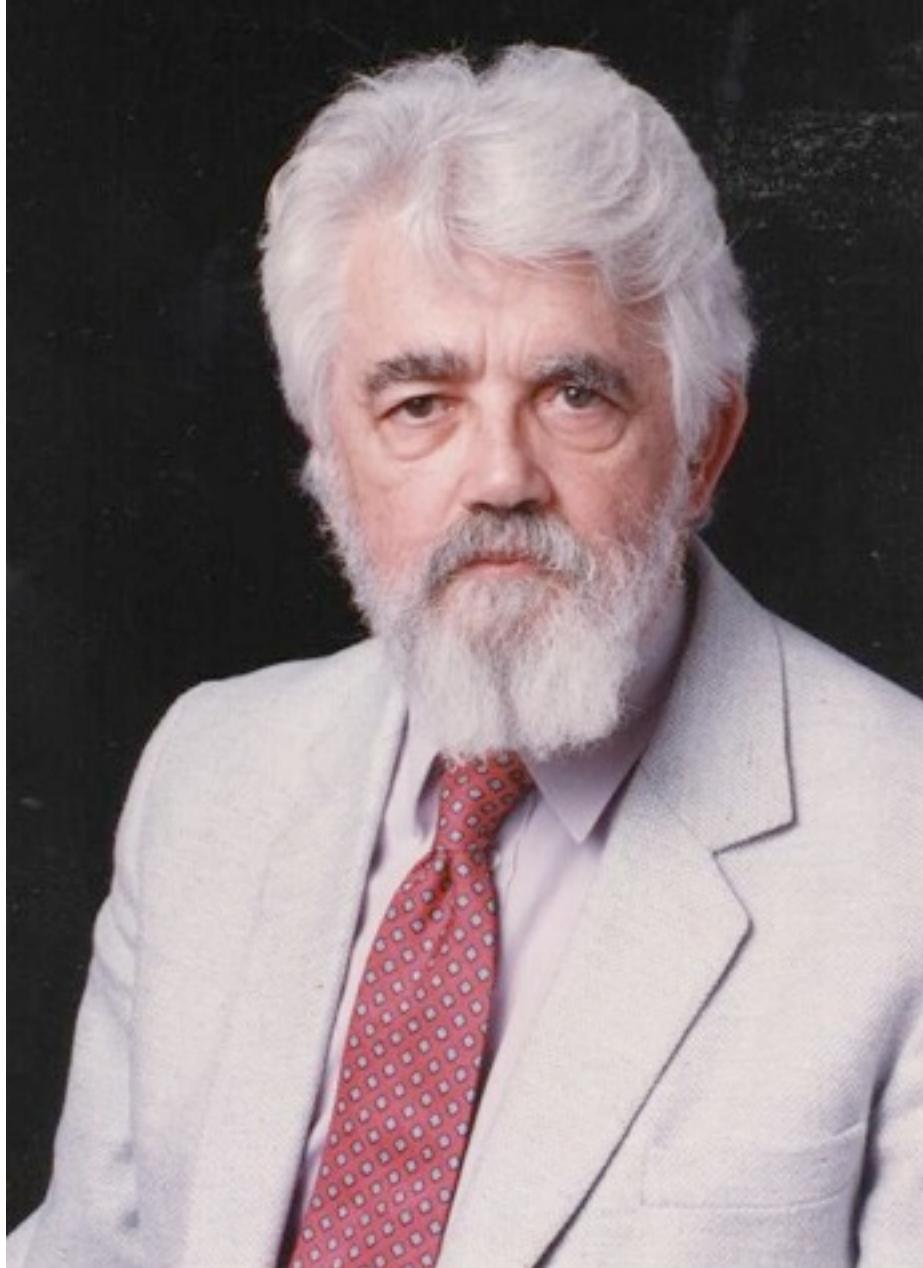

Logic vs. Common Sense

What's an anagram of “Banach-Tarski”?

A: “Banach-Tarski Banach-Tarski”

A program has *common sense* if it automatically deduces for itself a sufficiently wide class of immediate consequences ...

Programs with Common Sense (1959)

John McCarthy (1927-)

Common Sense Defined

- Common Sense Knowledge is:
 - That which is commonly observed
 - Or easily derived from common sense
- Common sense is:
 - Applying common sense knowledge to reach good conclusions or take good actions

Empiricism
+
Rationalism

“Common sense” problems?

- Its largest airport is names for a WWII hero, its second largest, for a WWII battle.
A: What is Chicago?
(Trebek, 2010)
- What women have worn Chanel clothing to award ceremonies?
What is the capital of Liechtenstein?
What pathways are mediated by CD44?
A: Best systems score in range of 77%
(TREC, 2008)

Watson vs. Google

1	1	1	X	2	X	48	Questions Watson had correct	79%
X	4	1	1	X	X	13	Questions Watson had wrong	21%
1	1	X	7	X	2			
1	1	1	1	X	X	34	Questions Google had in top result	56%
1	1	X	1	1	1	14	Questions Google had in results 2-10	23%
						13	Questions Google didn't have in top 10 results	21%
5	1	X	1	1	1			
1	1	1	3	1	X			
4	1	3	2	1	2			
1	3	2	10	1	6			
1	1	1	X	1	1			
Watson correct			#	Rank on Google				
Watson correct, didn't answer			X	Not in first 10 results				
Watson wrong, didn't answer								
Watson wrong								

Watson, Jennings, Google-in-top-10: all 79%

“Google-proof” problems

- Joan made sure to thank Susan for all the help she had X? Who had X the help?

X = given: Susan; X = received: Joan

- The large ball crashed through the table because it was made of X? What was made of X?

X = steel: ball; X = styrofoam: table
(Levesque, 2011)

“Google-proof” problems

- The man lost his balance on the ladder.
What happened as a result?
A: He fell off the ladder.
B: He climbed up the ladder.
- Human agreement: 96.5%
- “Google-proof?”
Baseline word frequency methods: 58%

(Roemmele, Bejan, & Gordon, 2011)

Common Sense Defined

- Common Sense Knowledge is:
 - That which is commonly observed
 - Or easily derived from common sense
- Commons sense is:
 - Applying common sense knowledge to reach good conclusions or take good actions

Empiricism
+
Rationalism

That Which is Commonly Observed

- 15 million books
- 10 billion images
- 1 trillion web pages
- Trillions of user interactions per year
- 10 petabytes/year of video
(40 hours/minute)

(Och *et al.*, 2007, etc.)

Translation from Ngrams (etc.)

- **EN:** We shall therefore say that a program has common sense if it automatically deduces for itself a sufficiently wide class of immediate consequences of anything it is told and what it already knows.
- **EN→ES:** Por lo tanto, diremos que un programa tiene sentido común, si se deduce automáticamente por sí mismo una clase suficientemente amplia de las consecuencias inmediatas de todo lo que se dice y lo que ya sabe.
- **EN→ES→EN:** Therefore, we say that a program has common sense if it automatically deduces for itself a sufficiently wide class of immediate consequences of all that is said and what you know.

Example for Italian - English

Piano della NASA per inviare una sonda sulla superficie lunare

L'ente spaziale americano, NASA, ha annunciato che la prossima missione sulla Luna non sarà limitata a orbitare intorno al satellite, ma che includerà anche il lancio di due veicoli spaziali che raggiungeranno la superficie lunare per mezzo di un atterraggio con schianto.

Il Lunar Reconnaissance Orbiter (LRO), la cui missione principale è quella di esplorare la Luna, invierà una navetta di appoggio e una sonda a impatto verso un cratere situato al polo sud lunare.

Sembra che il cratere sia ricco di idrogeno e forse ghiaccio.

Questa missione va vista nel contesto di una serie di iniziative che hanno lo scopo di riportare gli astronauti sulla Luna e, forse, di farceli rimanere per un periodo superiore rispetto a quello della missione Apollo.

NASA's Plan to Send a Probe on the Lunar Surface

The American space agency, NASA, announced that the next mission to the Moon will not be limited to orbit around the satellite, but also include the launch of two spacecraft that will reach the lunar surface by means of a crash landing.

The Lunar Reconnaissance Orbiter (LRO), whose mission is to explore the Moon, will send a shuttle to and support a probe into an impact crater located on the south lunar pole.

It seems that the crater is full of hydrogen and possibly ice.

This mission should be seen as part of a series of initiatives that aim to bring the astronauts on the moon and, perhaps, let us stay for a period longer than the Apollo mission.

Laudato sie, mi Signore cum tucte le Tue creature,
spetialmente messor lo frate Sole,
lo qual è iorno, et allumini noi per lui.

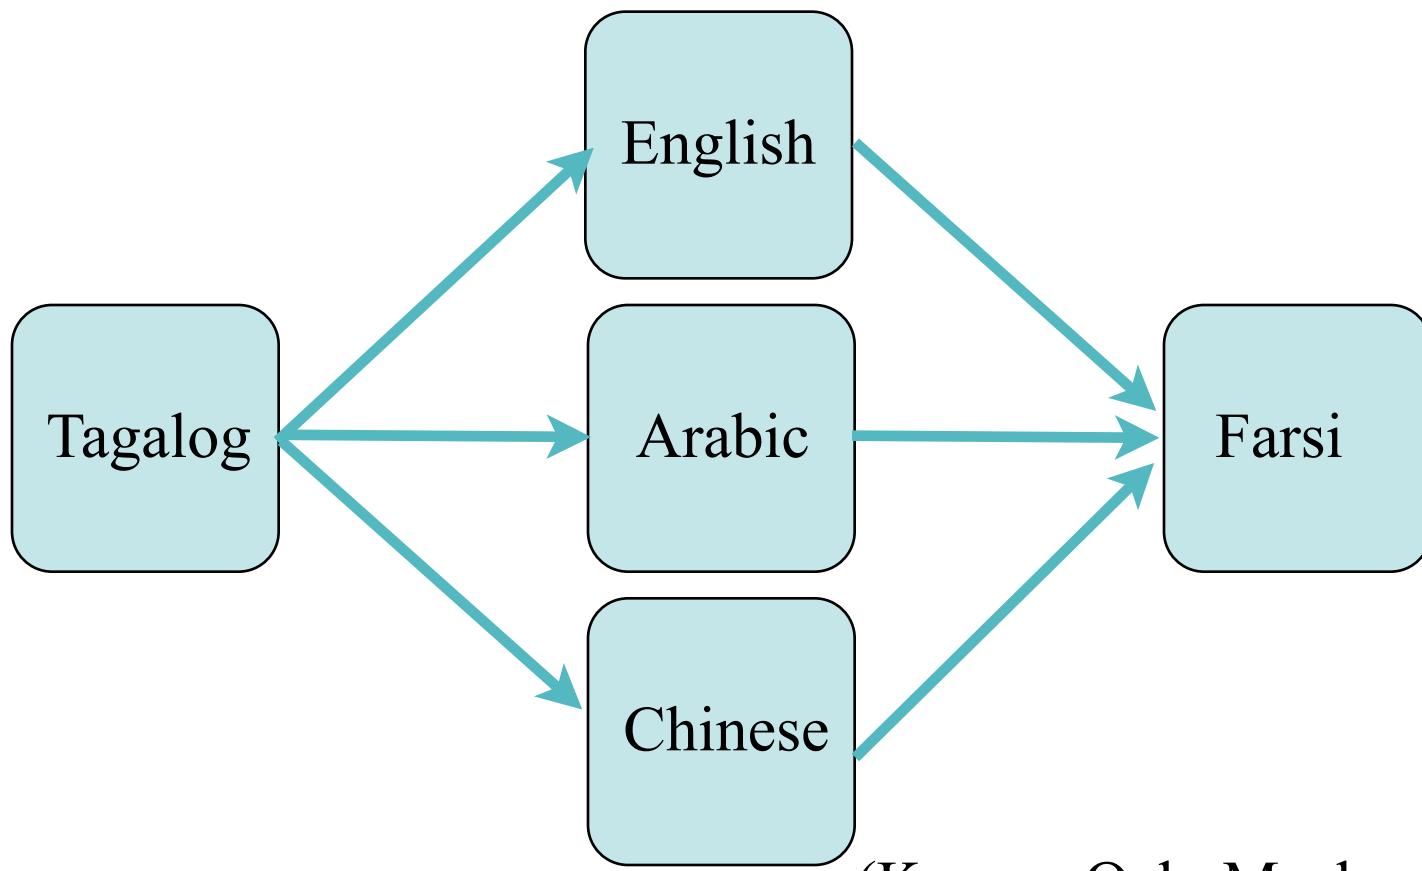

Et ellu è bellu e radiante cum grande splendore:
de Te, Altissimo, porta significatione.
Laudato si, mi Signore, per sora Luna e le stelle

Translating Poetry? Eng(Wilde) ⇒ Fr(Human) ⇒ Eng(MT)

Wilde's original	Our translation
<p>He did not wring his hands, as do Those witless men who dare To try to rear the changeling Hope In the cave of black Despair: He only looked upon the sun, And drank the morning air.</p>	<p>Without hands twisted like these men, Poor men without hope, dare To nourish hope in our vault Of desperation there And looked toward the sun, drink cool Until the evening air.</p>
<p>With slouch and swing around the ring We trod the Fool's Parade! We did not care: we knew we were The Devil's Own Brigade: And shaven head and feet of lead Make a merry masquerade.</p>	<p>We are in our circle we Dragged like the Fools' Parade! It mattered little, since we were The Devil's sad Brigade: A shaved head and the feet of lead Regardless gay charade!</p>

(Genzel, Uszkoreit, Och, 2010)

FR: fauteuil

EN: chair

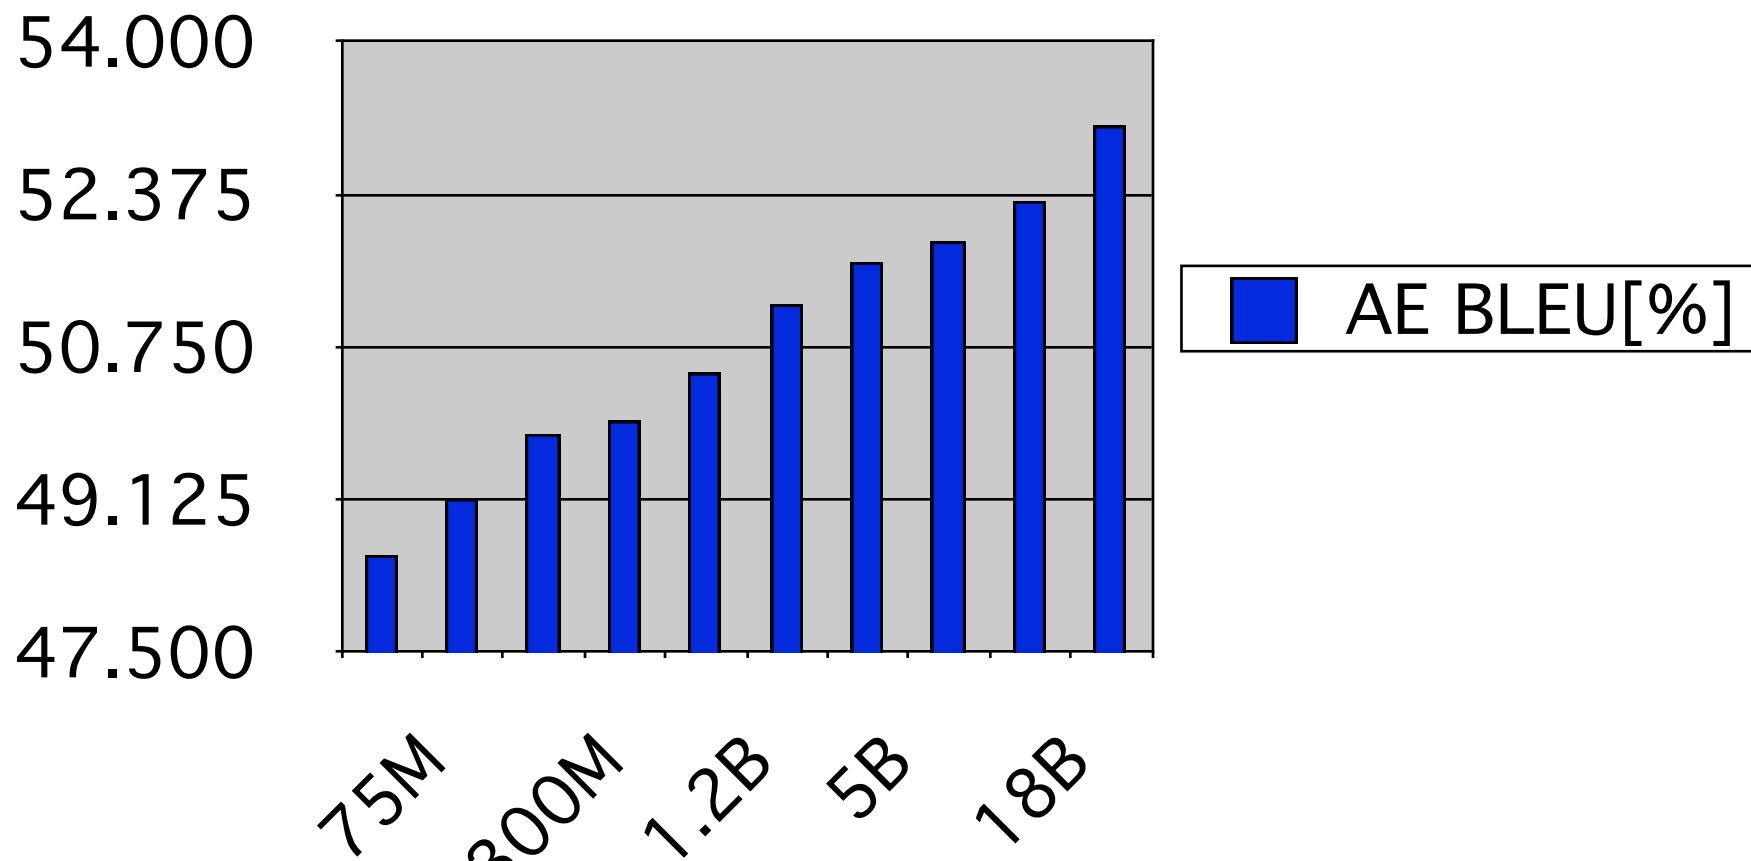

Extraction vs Annotation

- Annotation as a practical strategy
 - Minimize the re-computation of petabytes
- Annotation as a theoretical strategy
 - Addresses well-known problems:
 - Context
 - Qualification
 - Elaboration
 - Nonmonotonicity

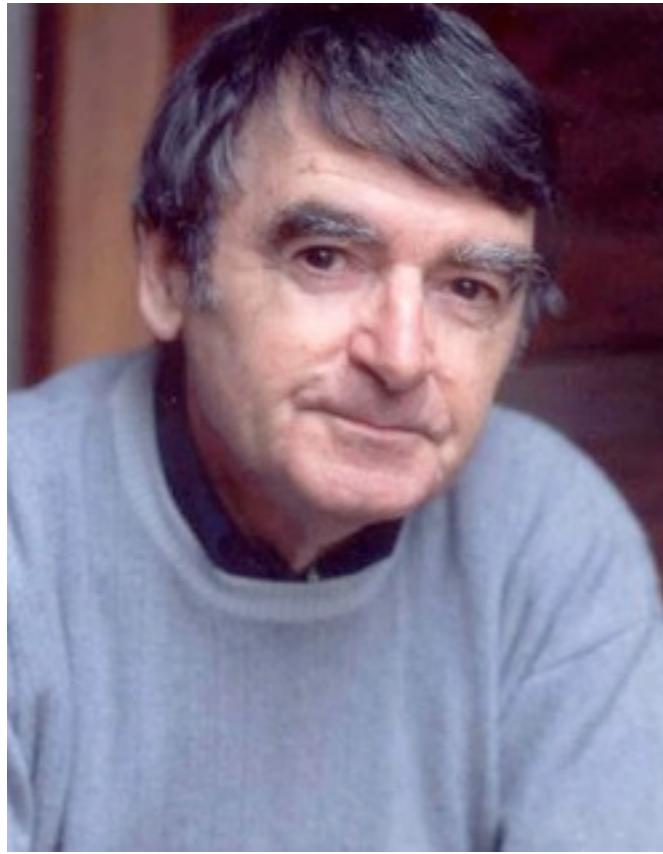

“Who are you and what do you want?” he asked gruffly, standing in front of them and towering tall above Gandalf.

Q: *Is Beorn taller than Gandalf?*

More Data, More Better

A red-bordered input field contains the words "finitely related" in a black, handwritten-style font. Below the input field is a yellow button with a right-pointing arrow containing the text "Type the two words:". To the right of the input field are three small icons: a circular arrow, a speaker, and a question mark. To the right of these icons is the reCAPTCHA logo with the tagline "stop spam. read books."

[Submit](#)

The words above come from scanned books.
By typing them, you help to digitize old texts.
